

Croatia Coast - Adriatic Islands South 1:100,000 Cycling Map, GEOTOUR

Croatia - Dalmatian Islands South 1:100,000 Cycling Map, 2012 edition GEOTOUR This double sided topographic map, designed specifically for cyclists, covers the coastal section from Drvenik to Dubrovnik, extending some 10 - 15 km (6 - 10 miles) inland but is focussed on the adjacent islands of Peljesac, Lastovo, Mljet, the Elaphites, Susac and a tip of Korcula. It also includes the estuary of the Neretva River. The map provides an excellent balance between coverage of a sufficiently wide area and detailed road presentation, plus topographic information not found on regular road maps. The map carries all the usual information expected from topographic maps at this scale: peaks, glaciers, passes, caves, sink holes, names of mountain ranges and other geographical features, the railway to Ploce, marinas, diving sites, administrative boundaries, etc. The terrain is shown at detailed scale of 1:100,000 (1 inch = 1.58 miles) with contour interval 20 m. Additional colouring shows different types of vegetation or land use (forest, shrubland, swamp). It shows roads from the coastal motorway to unpaved roads to trails and local footpaths as well as car ferries. Other tourist information indicated by symbols includes campsites, beaches, huts, refuges, ship wrecks, notable sites, etc. Map legend is in Croatian, English and Czech. Sheet size 96 x 66 cm / 37.5 x 26 in. The reverse includes informative text on main localities of interest (that are highlighted in the map) in Croatian, English and Czech, with many colour pictures, a list of diving centres with contacts and a brief vocabulary. For the northern Adriatic islands see map 9788090500006.
